Description Integrate data from your UPS system into an existing Industrial Automation or Building Management System using an Eaton X-Slot Modbus Card. Enable real-time remote monitoring of key UPS status information with this connectivity device, featuring a built in X-slot and an RS-485 network connection.

X-Slot Modbus RTU Card - EATON UPS Systems

The Eaton ATC-900 supports RTU mode. The main advantage of RTU mode is its greater character density¹, which provides for better data throughput at the same baud rate. A RTU query or response is placed by the transmitting device into a Modbus message packet, which has a known beginning and ending point.
