Transpiration lab report A Project Report Submitted in. Barley (*Hordeum vulgare* L.) was used in this experiment. Most of the water a plant absorbs is not used for a plant's daily functioning. In this practical experiment, students look at how at potometer can be used to measure factors affecting transpiration rates, and develop investigations to.

Transpiration lab report - by Ray Harris Jr

The answer to this question depends somewhat on the type of plant and the situation for which it is adapted. In general, however, unless a plant is specially adapted for hot conditions, the rate of transpiration will drop in a hot environment because heat stress may cause the stomata to close, which conserves water.
