1.2 Stochastic Processes Definition: A stochastic process is a family of random variables, $\{X(t) : t \in T\}$, where t usually denotes time. That is, at every time t in the set T , a random number $X(t)$ is observed. Definition: $\{X(t) : t \in T\}$ is a discrete-time process if the set T is finite or countable. In practice, this generally means $T = \{0, 1, \dots\}$
