While mastery of the many new terms and concepts may require special effort, the return on this investment is considerable.

Relational Frame Theory: A Post-Skinnerian Account of ...

Relational frame theory argues that such performances are at the heart of any meaningful psychology of language and cognition. From a very early age, human beings learn relations of similarity, difference, comparison, time, and so on, and modify what they do in a given situation based on its derived relation to others situations and what is known about them.

Account Of Human Language
Relational frame theory (RFT) is a psychological theory of human language. It was developed originally by Steven C. Hayes of University of Nevada, Reno and has been extended in research, notably by Dermot Barnes-Holmes and colleagues of Ghent University. Relational frame theory argues that the building block of human language and higher cognition is relating, i.e. the human ability to create bidirectional links between things.
